

Wash ClothBaseLine UV & Conventional

Baldwin

K-Supply

K-Supply Wash Cloth BaseLine UV & Conventional is a newly developed product of the K-Supply Wash Cloth solutions for sheetfed printing presses.

Increased production time

BaseLine cleaning rolls will enhance your cleaning performance while reducing maintenance costs, waste, chemicals usage and manual handling.

Since BaseLine utilises the "All-in-One" concept developed by Baldwin Technology, each roll has an optimal volume of cleaning solvent applied and a generous cloth length. As a result, BaseLine will reduce the amount of roll changes and increase the production time. The solvent is approved for full material compatibility in all Komori presses. Additionally, since the BaseLine cleaning rolls are individually vacuum-sealed, they have an optimised shelf life.

This product, tried and tested at the Komori Graphic Center-Europe, is highly effective and suitable for all UV and conventional printing presses.

Benefits

- All-in-One concept, no manual handling required.
- Material compatibility in all Komori presses.
- Vacuum-sealed, optimised shelf life.
- VOC-free solvent.

Specifications

Product name	K-Supply Wash Cloth BaseLine by Baldwin
Application	Wash cloths to clean presses with optimised printing results. Suitable for UV & conventional presses and mixed printing.
Size	Customised
Packaging	Vacuum and heat-sealed packaging
