

Conventional Solvent

K-Supply

K-Supply Conventional Solvent is an efficient cleaner, specially suitable for the cleaning of blankets and ink rollers. The Conventional Solvent has been tried and tested at the Komori Graphic Centre Europe, is highly effective and suitable for all conventional sheetfed printing presses.

Benefits

- Low in odour.
- Efficient emulsification with water.
- Inhibites corrosion.

Processing information

Blankets

Put K-Supply Conventional Solvent on a clean dampening cloth and clean quickly with long strokes to give the solvent and water enough time to penetrate the ink and paper related deposits. If necessary, repeat this procedure. Finish the cleaning process by using clean water to obtain a fast drying of the rubber surface.

Ink rollers

Start by using K-Supply Conventional Solvent undiluted. Use a blade to remove the ink residues and use only water on a clean cloth to remove any remaining emulsifiers.

Automatic cleaning

Follow the instructions of the wash program.

Directions for Use:

For details, please refer to the safety data sheet.

Specifications

Product name	K-Supply Conventional Solvent
Application	Universal wash for blankets and/or ink rollers. Suitable for conventional sheetfed systems.
Properties	Colour: Light yellow Density: 0,785- 0,795 g/cm ³ Flash point: 63°C Use within 12 months.
Packaging	20 Kg Can
