

Wash Cloth PREPAC® UV & Conventional

Baldwin

K-Supply

K-Supply Wash Cloth PREPAC® UV & Conventional improves your cleaning performance while reducing maintenance costs, waste, chemicals usage and manual handling.

The cleaning efficiency of K-Supply Wash Cloth PREPAC® UV & Conventional enables faster cleaning and shorter make ready times, leading to increased production time. PREPAC® is featured with the unique "All-in-One" concept developed by Baldwin Technology.

This product, tried and tested at the Komori Graphic Centre-Europe, is highly effective and suitable for all UV and conventional printing presses.

Up to 25% reduced start-up waste

K-Supply Wash Cloth PREPAC® UV & Conventional enables dryer blankets after wash-up, resulting in a reduced amount of waste sheets during start-up, by up to 25%.

Up to 20% reduced wash time

The increased cleaning ability of the new cleaning agent reduces the wash time by up to 20% each time, leading to more production time and fewer roll changes.

Benefits

- Optimised for UV, conventional and mixed presses.
- Consistent cleaning result.
- Faster cleaning, shorter make ready times, increased productivity.
- Reduced start-up waste, up to 25%.
- Reduced wash time, up to 20%.
- VOC-free cleaning solvent.
- Reduced consumables waste and manual handling.
