

# High Performance Washcloth for UV, Conventional & Mixed

## K-Supply

K-Supply High Performance Washcloth for UV, Conventional & Mixed improves your cleaning performance while reducing maintenance costs, waste, chemicals usage and manual handling.

The cleaning efficiency of K-Supply High Performance Washcloth for UV, Conventional & Mixed is made with the unique SCIS® technology, which give you faster cleaning and shorter make ready times.

This product, tried and tested at the Komori Graphic Centre-Europe, is highly effective and suitable for all UV, Conventional and Mixed printing presses (please choose the right solvent for your application).

K-Supply High Performance Washcloth UV, Conventional & Mixed gives you dryer blankets after wash-up, which results in a reduced amount of waste sheets during start-up, up to 20%.

The increased cleaning ability of the cleaning agent reduces the wash time up to 20% each time, leading to more production time and fewer roll changes.

### Benefits

- Optimised for UV, conventional and mixed presses.
- Consistent cleaning result.
- Faster cleaning, shorter make ready times, increased productivity.
- Reduced start-up waste, up to 20%.
- Reduced wash time, up to 20%.
