

Clean Inker Roller Combi Wash

Prisco

K-Supply

K-Supply Clean Inker Roller Combi Wash is a class AIII high-strength roller and blanket wash for use with conventional, UV and H-UV/H-UV L (LED) inks. The formula consists of solvents and surfactants to facilitate deep cleaning of lithographic blankets and rollers.

Combi Wash conforms to the most stringent requirements of the world's leading press manufacturers. K-Supply Clean Inker Roller Combi Wash is certified by ISEGA for food packaging printing.

Benefits

- Increases ink receptivity.
- Prolongs blanket and roller life.
- Contains no aromatic hydrocarbons.
- Facilitates removal of paper dust and glaze during ink removal.
- ISEGA Certificate for food packaging printers.

Directions

Rollers

Apply Clean Inker Roller Combi Wash to the roller train. Set the wash-up blade and apply an additional amount to flush ink residues from roller train. Reapply as needed. To de-lint and deglaze the rollers, add water to the wash while the press is running.

Blankets

Apply Clean Inker Roller Combi Wash to a rag and wipe the surface of the blanket until clean. To enable the rag to glide more easily over the blanket surface, simply apply a small amount of water to the rag. This will also de-lint and deglaze the blanket. Do not apply by hand while blanket is in motion.

Automatic wash-up systems

Follow the instructions of the press manufacturer, and adjust, if necessary, time and quantity.

This formula is not compatible with all EPDM compounds. Customers are advised to evaluate a sample of their roller or blanket material before using. Read MSDS before using this product.

Specifications

Product name	K-Supply Clean Inker Roller Combi Wash by Prisco
Application	For conventional, UV and H-UV/H-UV L (LED) inks. Especially suitable for the food packaging industry.
Flash point	67 °C
Packaging	25 Ltr Can
