

# K-Ink Siegwerk

## K-Supply

K-Ink is developed by Komori and Siegwerk and matches the high Komori standard targets. This ink will optimise your print quality and is manufactured especially for presses equipped with low energy H-UV or H-UV L (LED) drying technology. K-Ink has a high performance level when used in conjunction with the Komori-Matic Dampening Systems, with low or zero alcohol consumption on press.

K-Ink is the ideal solution for perfecting presses and is compatible with all UV suitable ink rollers. K-Ink remains stable in high speed presses with a wider tolerance during printing.

K-Supply K-Ink by Siegwerk is the best solution for your production process.

### Benefits

- K-Ink is a next level product developed for high end quality applications.
- The ink is de-inkable, has a very robust water/ink balance and a very stable runnability for short and long-term print runs.
- The ink is suitable for UV and H-UV/ H-UV L (LED) printing.
- It features a high colour intensity and present a very good dot gain definition.
- Excellent rub and scratch resistance as well as improved ink build-up on the impression cylinder.
- Good ink / water balance and colour stability, resulting in less paper waste at the start of every job.
- Of course, the new series is following the EuPIA Exclusion Policy Guidelines regarding reclassified photoinitiators.

### Specifications

Product name	K-Supply K-Ink by Siegwerk
Application	All types of high quality commercial printing jobs, particularly recommended for luxury magazines, covers and other high-end jobs.
Substrates	All types of papers and plain boards. Adhesion on nonabsorbent substrates requires checking before use.
Packaging	2,5 Kg Vacuum Can 2 Kg Cartridge 200 Kg Drum

**⚠ Directions for Use:**
