

Sumida Pro-Bio Ink

K-Supply

K-Supply Sumida Pro-Bio Ink is a high quality, user-friendly and versatile conventional offset ink based on vegetable oil. This ink consists mostly of renewable sources and contains less than 1 % mineral oil.

Sumida Pro-Bio Ink is developed to remain stable on high speed presses, up to B1+ format including 8 - 10 colour machines with high volume jobs. Combining stable press performance with intense colours, fast setting, quick drying and gloss effects, this ink enables the job to be transferred to the finishing process quickly. Sumida Pro-Bio Ink, tried and tested at the Komori Graphic Center-Europe, is highly effective on all conventional printing presses.

Available in five colours:

- Black
- Deep black
- Cyan
- Magenta
- Yellow

Benefits

- High colour intensity.
- Efficient work and turn processes.
- Rub resistant.
- Environmentally friendly.
- Manufactured without cobalt.
- Complies with ISO 12647/2.
- Maintains excellent press stability.
- Suitable for use with lamination, UV varnishes and water-based coatings.
- Also applicable for thin paper stocks.

Specifications

Product name	K-Supply Sumida Pro-Bio Ink
Application	Suitable for all (perfecting) sheetfed offset printing presses.
Markets	Commercial, label printing and packaging.
Substrates	Cardboard, gloss, matt, recycled and uncoated papers.
Packaging	1 Kg Can or 2,5 Kg Can 2 Kg Cartridge 200 Kg Drums

 **Directions for Use:**
For details, please refer to the safety data sheet.
