

Clean Inker Roller Combi Wash

Prisco

K-Supply

K-Supply Clean Inker Roller Combi Wash is a class AIII high-strength roller and blanket wash for use with conventional, UV, H-UV and H-UV-L inks. The formula consists of solvents and surfactants to facilitate deep cleaning of lithographic blankets and rollers. Combi Wash conforms to the most stringent requirements of the world's leading press manufacturers. Combi Wash is certified by ISEGA for Food Packaging printing.

Benefits

- Increases ink receptivity.
- Prolongs blanket and roller life.
- Contains no aromatic hydrocarbons.
- Facilitates removal of paper dust and glaze during ink removal.
- ISEGA Certificate for Food Packaging printers.

Directions

- For rollers, apply Clean Inker Roller Combi Wash to the roller train. Set the wash-up blade and apply an additional amount to flush ink residues from roller train. Reapply as needed. To de-lint and deglaze the rollers, add water to the wash while the press is running.
- For blankets, apply Clean Inker Roller Combi Wash to a rag and wipe the surface of blanket until clean. To enable the rag to glide more easily over the blanket surface, simply apply a small amount of water to the rag. This will also de-lint and de-glaze the blanket. Do not apply by hand while blanket is in motion.
- On automatic wash-up systems: follow the instructions of the Press manufacturer, and adjust, if necessary, time and quantity.

This formula is not compatible with all EPDM compounds. Customers are advised to evaluate a sample of their roller or blanket material before using.

Read SDS before using this product.

 **Directions for Use:**
