

Clean Inker Roller, UV NC Pel

Prisco

K-Supply

K-Supply Clean Inker Roller UV NC Pel Blanket and Roller Wash is an excellent cleaner for presses utilising today's UV, H-UV and H-UV-L inks. This product contains custom blended components that penetrate and soften ultraviolet inks and removes them from rollers and blankets. The product is compatible with EPDM rollers and blankets. This product is certified by ISEGA for food packaging printing.

Benefits

- 100% water miscible, de-lint and deglaze while you remove ink.
- Slow evaporation rate.
- Very low odour.
- Minimal to no swell of EPDM rollers and blankets.
- ISEGA Certificate for Food Packaging printers.

Directions

- For rollers, apply Clean Inker Roller UV NC Pel to the roller train. Set the wash-up blade and apply an additional amount to flush ink residues from roller train. Reapply as needed. To de-lint and deglaze the rollers, add water to the wash while the press is running.
- For blankets, apply Clean Inker Roller UV NC Pel to a rag and wipe the surface of blanket until clean. To enable the rag to glide more easily over the blanket surface, simply apply a small amount of water to the rag. This will also de-lint and de-glaze the blanket. Do not apply by hand while blanket is in motion.
- On automatic wash-up systems: follow the instructions of the Press manufacturer, and adjust, if necessary, time and quantity.

Read SDS before using this product.
