

K-Ink

Siegwerk

K-Supply

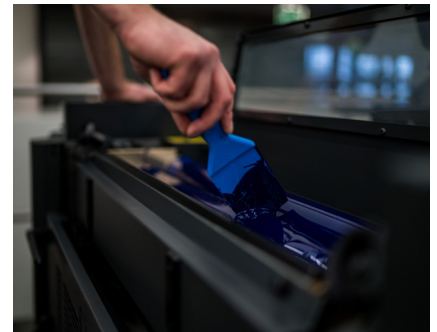

K-Ink is developed by Komori and Siegwerk and matches the high Komori standard targets. This ink will optimise your print quality and is manufactured especially for presses equipped with low energy H-UV or H-UV-L drying technology. K-Ink has a high performance level when used in conjunction with the Komori-Matic Dampening Systems, with low or zero alcohol consumption on press.

K-Ink is the ideal solution for perfecting presses and is compatible with all UV suitable ink rollers. K-Ink remains stable on high speed presses with a wider tolerance during printing.

K-Supply K-Ink by Siegwerk is the best solution for your production process.

Benefits

- Excellent press behaviour and stability.
- High scratch resistance.
- Does *not* contain photo initiator 369 (banned as of 01-09-2018).
- Good ink/water balance and colour stability, resulting in less paper waste at the start of every job.
- K-Ink is developed and tested on multiple print technical items in collaboration with Komori.
- K-Supply is part of the continuous development of the H-UV and H-UV-L process by Komori.

Specifications

Product name	K-Supply K-Ink by Siegwerk
Application	All types of high quality commercial printing jobs, particularly recommended for luxury magazines, covers and other high-end jobs.
Substrates	All types of papers and plain boards. Adhesion on non-absorbent substrates requires checking before use.
Packaging	2,5 Kg vacuum cans 2 Kg cartridges 200 Kg drums

 **Directions for Use:**
For details, please refer to the safety data sheet.
