

K-PressNavi

KOMORI Kare

K-PressNavi displays a convenient operating navigation to every press operator in each sort of press room. The software can easily be viewed on the screen of the press operation stand, the Print Quality Control (PQC). The system is a completely new printing information tool that supports standard printing operation in the printing workplace.

This KomoriKare product enables the certain implementation and management of press maintenance by a convenient and time-saving use of press maintenance scheduling and alarm functions.

Navigation gives the press operator necessary information with a video-equipped electronic manual from the PQC monitor. Komori's original manual of operating procedures can easily be opened on K-PressNavi.

K-PressNavi is the new navigation system that fully supports the standardization of your (and your customers') printing needs.

Benefits

- A higher return on investment.
- Increase in productivity.
