

Wash Cloth Conventional

K-Supply

The Wash Cloth Conventional is made from highly absorbent material and PET, joined through a laminating spun laced process. The product is pre-saturated with a washing solvent and cleans the blanket perfectly. The consistency and quality of this wash cloth gives an excellent result, reduces wash-time and optimises total production time.

Today, the K-Supply Wash Cloth Conventional is not only the standard in the Komori Graphic Center Europe, but is widely used by Komori customers on presses all over the continent.

Advantages

- Suitable for even the most demanding quick washing programmes.
- Reduces wash time.
- Increases productivity.
- Suitable for all conventional printing presses.
