

# Performance Audit for Sheet Machine Condition Checkup

## KOMORI Kare

### A professional diagnosis of a machine's condition followed by guidance on performance improvement.

A Komori One-Day Check is recommended as the first step to restoring an aging machine's operational performance. The necessary equipment checks are conducted by highly skilled and trained Komori service representatives who then compile a comprehensive One-Day Check report. Thereafter, an agreed medium and long-term plan of action is compiled with the help of the user. This approach has been proven to reduce unplanned machine stoppages and to help the user to budget for annual press maintenance.

### One-Day Check Details

Target models Komori sheetfed presses

Work period 1 day

\*Cost depends on model.

For details, contact your service representative.

### Main check items

### Schedule of One-Day Check

**Check day** **One-Day Check**  
Komori representative holds a short review meeting with the Operator to confirm details on the Pre-check Operator Assessment Feedback Form. Checks the machine, giving priority to the highlighted area on the press. Komori gives a summary report on the condition of the machine.

**About 1 week later** **One-Day Check Report**  
Komori presents a detailed One-Day Check report on the condition of the machine with recommended further actions and spare parts. Using the above information, an agreed action plan is compiled.

### Notes

- For printing problems such as doubling, smearing and streaking as well as oil and air leaks, a separate consultation is necessary.
- The machine report states the condition of the checked equipment at the time the One-Day Check was conducted.
