

Upgrade from PDC-Lite to Color+

KOMORI Kare

Our modern technology has developed to such an extent that the original PDC-S and PDC-L system fitted to your press is unlikely to offer the multi-layered benefits of quality, productivity and efficiency that the print professional now needs to give him the competitive edge. Ageing equipment such as PDS-SII will become unreliable and less accurate, leading to increased make-ready time and more running waste. In the near future, servicing costs will increase. PDC-S and PDC-L systems have already reached the end of its serviceable life and spare parts become obsolete. It's now time to upgrade to the latest generation of Color+.

Benefits of Color+

- M1 support to support the latest print standard requirements, ISO 12647-2:2013.
- G7/PSO Updates to support the latest print standards.
- Improved Inter-model agreement with eXact handheld spectrophotometer.
- BestMatch Update to improve adjustment recommendations for CMYK and spot colours on coated and uncoated substrates.
- Density values for spot colours too.
- Improved reporting capabilities.
- PantoneLIVE support.

Upgrade from PDC-Lite to KomoriKare Color+ Density

- Track.
- Vacuum pump.
- Densitometric scanning head.
- Interconnection cables and electronic documentation.
- Standard Head: Medium Spot Head which supports measurement modes M0 and M1, and supports colour bars with patches greater than 3.0mm in height x 3.0mm in width.
- Software: single license of Density Software, supports up to 8 printing units.
- Komori Color+ Density: incl. software (28", 29" and 40").
- Installed by a Komori engineer.

Options

- Polarizer Head: supports measurement modes M0, M1 and M3, the latter is polarized. For use with colours bars that have patches greater than 3.0mm in height and 3.0mm in width.
- Hand-Held: Komori eXact Advanced.

* Upgrade from PDC-Lite with head returned.

Specifications

Product name	KomoriKare Upgrade from PDC-Lite to Color+
Packaging	Covered in protective plastic, sent in a carton box.
