

Wash Cloth PREPAC® 2+ Conventional Baldwin®

K-Supply

The K-Supply Wash Cloth PREPAC® 2+ Conventional offers printers everywhere to get the best cleaning result out of their presses. Cleaning printing presses has become easier, quicker and more cost-effective than ever before. The wash cloths clean consistent and thorough and are suitable for both blanket and impression cylinder cleaning.

With its optimized formula of solvent and cloth, the cleaning efficiency of PREPAC® 2+ enables the lowest paper waste during start-up on the market, with enhanced focus on excellent performance and short cleaning time. PREPAC® 2+ is customized for extensive blanket cleaning efficiency in any offset press type and application.

Reduced start-up waste

Up to 50 % reduction of wasted copies during start-up is achieved due to the unique combination of the cleaning agent and its integration with cleaning media and press room chemicals. It effectively eliminates any toning and dripping after the wash.

Increased production time

Since PREPAC® 2+ is pre-impregnated with a cleaning agent that is precisely loaded in each cleaning roll, the wash time is significantly reduced, up to 25%. Shorter wash time and less roll changes minimize production downtime and increase the productivity up to 100 hours of additional production time per year.

Unmatched reliability

It is proven that K-Supply wash cloth PREPAC® 2+ conventional, which is based on Baldwins PREPAC® Advanced technology, enables the best cleaning results on the market.

Benefits

- Customized solution & support
- Less waste
- Shorter make-ready time
- Less consumable usage and handling
- Free from VOC chemicals
- Field and lab tested and approved

Specifications

Product name	K-Supply Wash Cloth PREPAC® 2+ Conventional With Baldwin®
Application	Wash cloths to clean presses with optimize printing results. Suitable for Blanket / Impression cylinder / Impression cylinder Rough surface
Size	Customized
Packaging	Vacuum and heat-sealed packaging
