

Packaging Experience Days Komori International Europe, Utrecht, The Netherlands May 16-17, 2018

Let's catch up over coffee!

Packaging in Focus during the Packaging Experience days!

To celebrate the arrival of the powerful new Komori Lithrone GX-40 to the Komori Graphic Centre in Utrecht, Komori is hosting a two day event dedicated to packaging solutions. Through a series of workshops and presentations on offset, digital and finishing solutions, you will be able to discover the latest trends in this dynamic sector of the market.

"Join us for coffee and conversation about productivity and special printing applications to create added value in the packaging business."

Komori offers an array of innovative, technology driven solutions tailored to the carton and packaging markets. For carton converters looking to diversify their business model, and for commercial printers looking to tap into the packaging market, this will be an ideal opportunity to see the latest technology in action.

- A well-thought-out theme that complements packaging and packaging solutions
- International guest speakers, interactive workshops and live demonstrations
- Premium brand-owners, explaining their wishes and needs
- Experience the full chain of packaging, from inspiration to finished product
- And the launch of the new Komori Lithrone GX-40 in the Komori Graphic Centre

We are pleased to invite you to the Komori Graphic Centre in Utrecht for the Packaging Experience days on 16 and 17 May 2018.

Register now at www.komori.eu

10:15 – Introduction Packaging Experience Days

10:30 – Start of the live demonstrations, seminars and workshops

The official program will end at 16:30

Live demonstrations and machines presented:

Komori Lithrone GX-640+C – raising packaging to a higher level

The impressive new Lithrone GX40 delivers world-class performance in deluxe packaging printing. Offering a sheet thickness range from 0.06-1.0 mm, this press provides stable operation at maximum printing speed of 18,000sph. The Press is equipped with a suite of innovative technology features, designed to improve quality and throughput.

Komori Lithrone G-540+C – world-class performance from commercial to packaging

Designed with Komori's dedication to precision manufacturing, the Lithrone G40 ensures high quality print with unsurpassed productivity. Manufactured with the focus on the environment, the Lithrone G40 promotes green printing by reducing consumables and energy usage and lowering the carbon footprint.

Komori Impremia IS29 – brings creativity to carton converting

Komori has advocated the Komori OnDemand concept for many years — the fusion of off-set and digital printing to accommodate the evolving print environment. As part of this initiative, Komori has developed a high-end digital printing system based on the technology and know-how gained over its decades of manufacturing offset and security printing presses. The Impremia IS29 is the professional production machine built for today's printers.

Highcon Euclid III - – opening doors to countless new opportunities in high value applications and new markets

The Highcon Euclid III replaces traditional time consuming and expensive setups, with an in-house controlled digital system, delivering improved responsiveness, intricate design possibilities enhanced efficiency.

Apressia CT-137 – sophisticated design combined with easy operation and stringent safety standards

See the exceptional new Apressia series of postpress equipment. The debut products in this series are the Apressia CT115/CT137 cutters, offering ease of use and flexibility, combined with outstanding productivity and cost performance. The sophisticated design delivers state of the art technologies and robust build quality.
